DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Hickle (US 20020017299). Hickle discloses an apparatus and method for providing a conscious patient relief from pain and anxiety associated with medical or surgical procedures comprising a first bolus delivery user interface, a second bolus delivery user interface that confirms a bolus initiated in the first interface, a third bolus delivery interface that appears if the amount is outside a predetermined range (Paragraphs 0062, 0063, 0102, 1014, 0115). The device includes a drug delivery display (Paragraph 0071). The display graphically shows bolus delivery. See Fig. 22A. Hickle discloses the method of starting a drug delivery system including the steps of initiating a first bolus delivery interface, initiating a second bolus interface, determining if the bolus is outside a predetermined range, and delivering the infusion (Page 20).
